The Pratt Institute Center for Community and Environmental Development (PICCED) provides community planning, technical assistance, advocacy, training and computer-mapping services to nonprofit community-based development organizations. PICCED was founded in 1963 and has dedicated its professional and educational services to community development organizations throughout the New York metropolitan region.

Selected services are provided on a low cost basis for qualifying nonprofit community organizations, government and business agencies including Community Housing Development Organizations (CHDOs), Community Development Corporations (CDCs), and Neighborhood Preservation Corporations (NPCs).

The GIS Team
Maki Okage, Artis Wright, Leena Shanbhag, Sayar Lonial
Paula Crespo, Mannix Gordon, Rex Curry
Geographic Information Systems (PICCED-GIS)

The PICCED-GIS team integrates socioeconomic profiles and demographic analysis with custom geographic data set creation, strategic mapping, and comprehensive planning services.

At PICCED, GIS is utilized as a planning tool for enhanced spatial visualization and analysis. The GIS team visualizes data to illustrate development activity and needs from a citywide to building-by-building perspective. Urban and regional planning services include surveys of land use and building conditions for economic development analysis throughout the New York metropolitan region.

We have compiled valuable government, business, and original PICCED-MAP databases in our PICCED-GIS data warehouse. This unique selection of data is especially designed to assist community development organizations in defining difficult problems and identifying resources for community-based economic opportunities.

PICCED-GIS data set development and mapping define the complex issues of economic development, transportation, environment, housing, land use and zoning, and demography.

Please review our most recent work on the PICCED web site. See: http://www.picced.org
Some of Our Recent Initiatives and Selected GIS Images:

Community 197a Planning
- Greenpoint Plan, Brooklyn, NY
  (Aerial photograph with environmental database)
- Red Hook Plan, Brooklyn, NY
  (Comprehensive topographic map with flood plain)
- Hunts Point Plan, Bronx, NY
  (Truck route analysis and open space resources)

Special Studies and Map Resources
- A Study for a Competitive Gowanus Canal
  Brooklyn, NY
  (Building footprint)
- Digital Elevation Model
  (Comprehensive GIS data warehouse)
- NYC Neighborhood Childcare Needs Assessment
  (Priority needs by zip code)
